

Structural Engineers Association of New York Young Member Group

Hilti Adhesive Anchor Seminar
Ironworkers Local 580, Long Island City, New York
August 23, 2018

Hilti hosted SEaONY's seminar on adhesive anchor installation providing an in depth presentation and hands-on demonstration. In the classroom, 25 attendees with varying experience gained insight on aspects of the adhesive anchor system including installation procedure, anchor types, application/environment specific protocol, and provisions implemented to reduce health risks. Samples of connection components were passed around to represent failure modes associated with various installation defects. In the hands-on segment, participants were able to personally drill into concrete block and install downward, as well as overhead, epoxy anchors.

Following the event, attendees were invited to network amongst each other over a YMG sponsored drink at a nearby beer garden.
