

TABLE OF CONTENTS

INTRODUCTION	iii
CHAPTER 1—UNRESTRAINED RETAINING WALL SYSTEMS	1
DESIGN EXAMPLE 1A	
Temporary Soldier Pile Shoring Wall	
Wall Requirements.....	2
Subsurface Conditions	2
Project Geotechnical Information Provided	2
Determine Soldier Pile Horizontal Forces	2
Determine Cantilever Soldier Pile Size	9
Determine Lagging Size.....	12
Determine Soldier Pile Deflection.....	14
Additional Factors to Consider When Designing.....	14
Sample Lagging Details and Corresponding Photos.....	15-21
DESIGN EXAMPLE 1B	
Permanent Soldier Pile Retaining Wall	
Design Requirements.....	22
Project Geotechnical Information Provided	22
Determine Soldier Pile Horizontal Forces and Pile Size.....	22
Seismic Increment	22
Determine Lagging Size.....	26
Welded Stud Capacity	30
Sample Shoring Details and Corresponding Photos.....	33-35
DESIGN EXAMPLE 1C	
Temporary Sheet Pile Shoring Wall	
Wall Requirements.....	36
Project Geotechnical Information Provided	36
Determine Sheet Pile Horizontal Forces.....	36
Things to Consider for this Shoring Type	38
CHAPTER 2—RESTRAINED RETAINING WALL SYSTEMS	39
DESIGN EXAMPLE 2A	
Temporary Restrained Soldier Pile Shoring Wall Using a Tieback	
Wall Requirements.....	40
Subsurface Conditions	40
Project Geotechnical Information Provided	40
Calculation Procedure for a Restrained Steel WF Soldier Pile Wall	40
Design Step #3.....	40
Design Step #5.....	40
Design Steps #6, #7 and #9	45
Design Step #13.....	55
Welded Stud Capacity	56
Tension Steel Strength	56
Tension Pullout Strength.....	58
DESIGN EXAMPLE 2B	
Permanent Restrained Soldier Pile Retaining Wall Using a Permanent Tieback	
Design Requirements.....	60
Design Step #3.....	60
Design Step #5.....	60
Design Steps #6, #7 and #9	64
Welded Stud Capacity	74

DESIGN EXAMPLE 2C

Temporary Restrained Deep Soil Mix Soldier Pile Shoring Wall Using a Tieback

Design Requirements77
Soil Mix Secant Wall Design77
Procedure for Wet Soil Mixing Restrained Soldier Piles77
Soil Mix Secant Wall Design80
Design Steps #6, #7 and #984
Soil Mix Lagging Design Step #1390
Flexural Check93
Shear Check93

DESIGN EXAMPLE 2D

Temporary Restrained Soldier Pile Shoring Wall Using a Concrete Deadman Anchor

Project Geotechnical Information Provided94
Dead-man Calculation for Restrained Steel WF Soldier Pile Wall94

CHAPTER 3—SOIL NAIL WALL SYSTEMS101

DESIGN EXAMPLE 3A

Temporary Soil Nail Wall Application

Example Overview102
Wall Requirements102
Subsurface Conditions102
Soil Nail Wall Loading102
Soil Nail Wall Configuration102
Overall Stability104
Stability Analysis Using SNAP-2104
Wall Geometry and Stratigraphy105
Results106
Summary of Overall Stability107
Global Stability107
Limit States–Strength108
SNAP-2 Report116

DESIGN EXAMPLE 3B

Permanent Soil Nail Wall Application

Example Overview132
Wall Requirements132
Subsurface Conditions132
Soil Nail Wall Loading132
Seismic Design Values132
Soil Nail Wall Configuration134
Overall Stability137
Stability Analysis Using SNAP-2137
Wall Geometry and Stratigraphy137
Results138
Summary of Overall Stability139
Global Stability139
Limit States–Strength139
SNAP-2 Report152

INDEX 178-183
